

Health & Safety Policy Statement

It is the policy of **Rochon Building Corporation** that primary attention will be given to safety and health considerations in all of our work performed. This involves the provision of safe working conditions, development, communication and implementation of safe work procedures, and effective worker training.

This objective is paramount within the organization, and goes hand in hand with a sincere recognition of our responsibilities. No job is so urgent that it cannot be conducted in a safe manner. The welfare of employees is our greatest concern.

We recognize a safe work environment can only be maintained through a united effort by all staff and contract personnel, and their assistance is hereby solicited.

Each level of management, beginning with the President:

- Is responsible to themselves, their managers and the corporation for work activities, supervision and results in job related accident prevention.
- Is vested with the necessary authority to investigate, correct, determine and instruct appropriate courses of action in order to eliminate work related hazards.
- Has accountability, which will be consistently measured and monitored to ensure compliance with all applicable health and safety laws, standards and statutes, including the *Occupational Health and Safety Act* and applicable *Regulations*, and the provisions of our corporate safe work policies and procedures.

All workers and contractors employed by **Rochon Building Corporation** are reminded of their duties and responsibilities pursuant to health and safety legislation, and will be constantly advised of their requirement to correct, or report job related safety concerns, and unsafe conditions to the appropriate authority.

We take our safety responsibilities seriously. Through corporate accountability for all of our ongoing projects, the development and implementation of safe work procedures, accident investigations, site safety talks, job site inspection results, and other relevant data, we will have the necessary tools to ensure the effective administration of our Corporate Health and Safety Program.

The attitude and cooperation of our employees and contractors in promoting workplace safety and accident prevention will assist our corporate goal to maintain a safe and healthy place to work, for all workers.
